

America First

ADDRESSING THE NEEDS OF OUR FUTURE NOW!

The Honorable Julius Genachowski
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Genachowski:

No matter how you look at it the benefits outweigh the drawbacks for Interoperability. It is the job of the FCC to keep the playing field level for all business opportunities. The shifting landscape in the wireless age has created a need for the public to have unrestricted access to do business, maintain interpersonal connections and support family life. We cannot afford a monopolistic throwback that will put America at the lowest end of the world mobility spectrum.

Very truly yours,

Vincent D McBride
